Time Loop Game with Amazon-Q-CLI

- Key Skills: Python, Pygame, Game Development, Debugging with AI Tools.
- Project Description: This 2D puzzle platformer challenges players to use time as a tool. Each loop records player actions and replays them as “ghosts,” allowing strategic interaction with the environment. From triggering levers to solving time-based puzzles, players collaborate with their past selves to progress. Built with Pygame and debugged using Amazon Q CLI, the game features precise action syncing, polished visuals, and modular architecture for easy extension.

Certifications
